# 40 Di trắc nghiệm Tiếng Anh 10

(Theo tinh thần thi mới của Bộ GD và ĐT)

CÁC ĐẠNG BÀI TẬP CƠ BẦN VÀ NÂNG CAO

- + Dùng cho học sinh phố thông trung học đầu cấp
- + Bối đường học sinh khá, giới môn tiếng Anh
- + Có đáp án sau mỗi để trác nghiệm

# Lời nói đầu

Theo xu hướng thi cử mới của Bộ Giáo dục và Đào tạo, bắt dấu năm học 2006, Bộ triển khai dần hình thức thi trắc nghiệm khách quan. Để giúp cho học sinh làm quen dần với phương pháp làm bài này, chúng tôi biên soạn cuốn sách "40 để thi trắc nghiệm tiếng Anh 10".

Mục đích của phương pháp trắc nghiệm này là nhằm đánh giá chính xác và theo chiều sâu của kiến thức ngôn ngữ học sinh đang học. Hơn nữa giúp cho học sinh nhạy bén với những ngữ pháp và cấu trúc cơ bản. Đề thi trắc nghiệm này được soạn từ dễ đến khó, gồm có 4 phần:

- 1. Pronounciation
- 2. Finding mistake
- 3. Grammar and structure
- 4. Reading comprehension

Đầy là loại bài tập trắc nghiệm có số lượng bài tập vừa phải và phù hợp với thời gian làm bài (từ 50 đến 60 phút), nên học sinh cần nắm những kiến thức từ phổ thông cơ sở và phương pháp làm bài trắc nghiệm thì mới đạt hiệu quả cao. Cuối mỗi đề trắc nghiệm đều có đáp án.

Chúc các bạn thành công với phương pháp kiểm tra mới này.

Chúng tôi rất mong nhận được những góp ý của các bạn học sinh và giáo viên. Xin chân thành cấm ơn.

Tác giả

Thân Trọng Liên Tân

### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi:

In 775 B.C, the first Olympic Games were held at the foot of Miount Olympus to honour the Greek's chief god, Zeus. The warm climate for outdoor activities, the need for preparedness in war, and their lifestyle caused the Greeks to create competitive sports. Only the elite and military could participate

firstly, but later the Games were open to all free Greek males who had no criminal record. The Greeks emphasized physical fitness and strength in their education of Youth. Therefore, contests in running, jumping, discus and javelin throwing, boxing and horse racing were held in individual cities, and the winners competed every four years at Mount Olympus. Winners were greatly honoured by having olive wreaths placed on their heads and having poems sung about their deeds. Originally, these contests were held as games of friendship, and any wars in progress were halted to allow the game to happen. They also helped to strengthen bonds among competitors and the different cities represented. The Greeks attached so much importance to the Games that they calculated time in four-year cycles called "Olympiads" dating from 776 B.C. The contests coincided with religious festivities and constituted an effort on the part of the participants to please the gods. Any who disobeyed the rules were dismissed and seriously punished. These athletes brought shame not only to themselves but also to the cities represented.

### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi:

One of the seven wonders of the ancient world, the Great Pyramid of Giza was a monument of wisdom and prophecy built as a tomb for Pharaoh Cheops in 2720 B.C. Despite its antiquity, certain aspects of its construction make it one of the truly great mader of the world. The thirteen-acre structure near the Nile River is a solid mass of stone blocks covered with limestone. Inside the number of hidden passageways and the burial chamber for the pharaoh. It is the largest single structure in the world. The four sides of the pyramid are aligned almost exactly on true north, south, east and west - an incredible engineering feat. The ancient Egyptians were sun worshipers and great astronomers, so computations for the Great Pyramid were based on astronomical observations. Explorations and detailed examinations of the base of the structure reveal many interesting lines. Further scientific study indicates that these represent a type of timeline of events-past, present and future. Many of the events have been interpreted and found to coincide with known facts of the past. Others are prophesied for future generations and are currently under investigation. Many believe that pyramids have supernatural powers and this one, is no exception. Some researchers associate it with extraterrestrial beings of the ancient past. nooce bender

8

41. What has research of the base revealed?
A. There are cracks in the foundation.
B. Tomb robbers have stolen the pharaoh's body.
C. The lines represent important events.
D. A superior race of people built it.
42. Extraterrestrial beings are
A. very strong wonders C. research in Egyptology.
B. astronomers in the ancient times. D. living beings from other planets.
43. What was the most probable reason for providing so many hidden passages?
A. To allow the weight of the pyramid to settle evenly.
B. To permit the high priests to pray at night.
C. To enable the pharaoh's family to bring food for the journey after life.
D. To keep grave robbers from finding the tomb and the treasure buried with the pharaoh.
44. What is the best title for the passage?
A. Symbolism of the Great Pyramid.
B. Problem with the construction of the Great Pyramid.
C. Wonders of the Great Pyramid of Giza.
D. Explorations of the Burial Chamber of Cheops.
45. On what did the ancient Egyptians base their calculation?
A. Observation of the celestrial bodies. B. Advanced technology.
C. Advanced tool of measurement. D. Knowledge of the earth's surface.
46. Why was the Great Pyramid constructed?
A. As a solar observatory, B. As a religious temple.
C. As a tomb for the pharaoh. D. As an engineering feat.
47. Why is the Great Pyramid of Giza considered one of the seven wonders of the World?
A. It is perfectly aligned with the four cardinal points of the compass and contains many prophecies.
B. It was selected as a tomb of Pharaoh Cheops.
C. It was built by a super race.
D. It is very old.
48. What do the interesting lines in the base symbolize?
A. Architects' plans for the hidden passage.
B. Pathways of the great solar bodies.
C. Astrological computations.
D. Date of important events taking place throughout time.
49. The word "feat" is closest in meaning to
A. accomplishment B. appendage
C. festivity D. structure
50. The word "prophesied" is closest in meaning to
A. affiliated B. terminated C. precipitated D. foretold

Paul Watson is an environmental activist. He is a man who believes that he must do something, not just talk about doing something. Paul believes in protecting endangered animals and he protects them in controversial ways. Some people think that Watson is a hero and admire him very much. Other people think that he is a criminal. On July 16, 1979, Paul Watson and his crew were on his ship, called the Sea Shepherd. Paul Watson and the people who work on this ship were hunting on the Atlantic Ocean near Portugal. However, they had a strange prey; instead of hunting for animals, their prey was a ship, the sierra. The Sea Shepherd found the Sierra ran into it and sank it. As a result the Sierra never returned to the sea. The Sea Shepherd, on the other hand, returned to its home in Canada. He and his workers thought that they had been successful. The Sierra had been a whaling ship which had operated illegally. The captain and crew of the Sierra did not obey any of the international laws that restrict whaling. Instead, they killed as many whales as possible, quickly cut off the meat and froze it. Later, they sold the whale meat in countries where it is eaten. He tried to persuade the international whaling commission to stop the Sierra. However, the commission did very little and Paul became impatient. He decided to stop the Sierra and other whaling ships in any way that he could. He offered to pay \$25,000 to anyone who sank any illegal whaling ship, and he sank the Sierra. He acted because he believes that the whales must be protected. Still, he acted without the approval of his government; therefore, his actions were controversial. He is not the only environmental activist. Other men and women are also fighting to protect the Earth.

39.

40. %A, don't need to

41.	An environmental activist is someone	who
	A. runs into whaling ships	
V	B. does something to protect the Earth	h
,	C. talks about protecting endangered :	species
	D. is a here like Paul Watson	
42.	When something is controversial	·
	A. everyone agrees with it	C. people have different ideas about it
	B, everyone disagrees with it	
43.	The members of a ship's crew are	
١.	A. the men and women who work on t	he ship
	B. the people who work on airplanes	
	C. all of the people on a ship, includin	g passengers
	D. the people who own the ship	*

Between 1977 and 1981, three groups of American women, numbering 27 in all, between the ages of 35 and 65, were given month-long tests to determine how they would respond to conditions resembling those aboard the space shuttle. Though carefully selected from among many applicants, the women were volunteers and pay was barely above the minimum wage. They were not allowed to smoke or drink alcohol during the tests and they were expected to tolerate each other's company at close quarters for the entire period. Among other things, they had to stand pressure three times the force of gravity and carry out both physical and mental tasks while exhausted from strenuous physical exercise. At the end of ten days, they had to spend - further twenty days absolutely confined to bed, during this time they suffered backaches and discomforts, and when they were finally allowed up, the more physically women were especially subject to pains due to a slight calcium loss. Results of the test suggest that women will have significant advantages over men in space. They need less food and less oxygen and they stand up to radiation better. Men's advantages in terms of trength and stamina, meanwhile, are virtually wiped out by the zero-gravitycondition in space.

41.	For how long was each woman teste	4?	
	A. 4 days B. 20 days	Cl. 27 days	D. 1 month
42.	What was the average number of we	men in rach group	tested?
+.	A. 9 B. 27	C. 38	Ð. 51
43.	Which of the following can be inferr	ed from the passag	e?
,	A. The tests were not carried out ab	oard the space shut	ttle.
	B. The women involved had previou	s physical fitness ti	raining.
	C. The women were tested once a ye	ear from 1977 to <b>19</b>	81.
	D. The test was carried out on women	en of all ages.	
44.	Which would be the most suitable ti	tle for passage?	
	A. Older women can travel in space	too.	
	B. Space testing causes backaches in	n women.	
	C. Poor wages for space test volunte	ers	
1	D. Tests show women suited for spa	ce travel.	
45.	What can be said about the women	who applied?	
	A. There were 27 in all.		
	B. They were anxious to give up eith	ier smoking or drin	king.
1	C. They had previously earned the r	ninimum wage.	
*	D. They choose to participate in the	tests.	
46.	According to the passage, physical a	and mental tasks w	ere carried out by the
	women		•
	A. prior to strenuous exercise.		
V	B. following strenuous exercise.		
	C. before they were subjected to unu	sual pressure.	
メ	D. after they were subjected to unus	ual pressure.	
47.	The calcium loss particularly affecte	d	
	A. all the women tested.		
V	B. those who had been particularly	active in the previous	us ten days.
1	C. those who were generally very ac	tíve.	
	D. those who had suffered backaches		
48.	Which of the following is suggested	4	
	A. High resistance to radiation.		
		D. Low oxygen i	ntake.
49.	Stamina means	0	D
=0	A. strain /B. resilience		
50.	The physical advantages men enjo	y in normal condi	tion are counteracted
	A. conditioning	B. virtue	
,	C. zero-gravity	D-food and oxy	rioris

### V. Đọc đoạn văn me và chọn câu trả lời phủ hợp cho các câu hỏi :

The air above our head is becoming cleaner. A breath of fresh air has been running right round the planet for the past five years. The planet is purging itself of pollution. Paul Novell of the University of Colorado, the co-author of a report on this phenomenon says, "It seems as if the planet's own cleansing service has suddenly got a new lease of life. Suddenly, there are a lot of changes going on up there." Estimates of the death toll from urban smogs have been steadily rising, so the new cleaner trend could have significant consequences for life expectancy in cities as well as for the planet itself. The sudden and unexpected reversal of several decades of worsening pollution extends from the air in city streets to the remotest mid-Pacific Ocean and Antarctica. Among the pollutants which have begun to disappear from the atmosphere are carbon monoxide, from car exhausts and burning rain forests, and methane from the guts of cattle, paddy fields and gas fields. Even carbon dioxide, the main gas behind global warming, has fallen slightly. There are two theories about why pollution is disappearing. First, there is less pollution to start with due to laws to cut down urban smogs and acid rain starting to have a global impact. Second the planet may be becoming more efficient at cleaning up. The main planetary clean-up agent is a chemical called hydroxyl. It is present throughout the atmosphere in tiny quantities and removes most pollutants from the air by oxidizing them. The amount of hydroxyl in the air had fallen by ■ quarter in the 1980's. Now, it may be reviving for two reasons: because the ozone hole has expanded, letting in more ultraviolet radiation into the lower atmosphere, where it manufactures hydroxyl. Then the stricter controls on vehicle exhausts in America and Europe may have cut global carbon monoxide emissions, thereby allowing more hydroxyl to clean up other pollutants.

### 41. What is the main topic of the passage?

- A. The decreasing pollution of the atmosphere.
- B. The changing pollutants in the atmosphere.
- C. Hydroxyl's influence on the atmosphere.
- D. The oxygenation of the atmosphere.

42.	The word "purging"	is closest in meani	ng to	
	A. destroying	B. refining	C. filtering	D. ridding

A access to details about atmospheric pollution B. recommendations from university research C. improvement in atmospheric conditions D. changes in their lifestyle  44. The word "toll" could best be replaced by A. costs B. count C. damage D. loss  45. What does the author suggest is the main cause of pollution reduction? A. Less impact from burning forest C. Curtailment of chemicals B. Smaller number of cars D. Fewer cattle and gas fields  46. The word "It" refers to A. urban smog B. a clean-up agent C. acid rain D. the ozone hole  47. It can be inferred from the passage that the cleansing of the planet is A. inexplicable B. confusing C. surprising D. predictable  48. Based on information in the passage, all of the following information referring to hydroxyl is true except A. The reduction in the ozone layer is beneficial to hydroxyl. C. There is difficulty in destroying carbon dioxide by hydroxyl. D. Ultraviolet radiation increases production of hydroxyl.  49. The word "reviving" is closest in meaning to A. reappearing B. refreshing C. reproducing D. repeating  50. The passage supports which of the following conclusions? A. The decrease of methane has enabled ultraviolet radiation to enter the atmosphere. B. An expansion in hydroxyl has enlarged the ozone hole. C. The reduction in carbon dioxide has produced a cleaner atmosphere. D. The beneficial effect of hydroxyl has aided the cleansing process.  ANSWER KEY - TEST 5  A B C D A	43. ## TEST 6

I. T	ìm một từ mà ph	ần gạch chân c	ó c <b>ách phát âm kh</b>	iác với những từ khác:
1.	A. government	B, wonder	C. worty	D. glory
2.	A. promise	B. devise	C. surprise	D. realise
3.	A. ploughed	B. coughed	C. laughed	D. fixed
4.	A. stronger	B. younger	C. finger	D. singer
5.	A. example	B. exhibit	C. exactly	D. exhibition
6.	A. good	B. flood	C. foot	D. roof
7.	A. humour	B. flour	C. rumour	D. honour
8.	A. hurry	B. hurt	C. turn	D. excursion
9.	A. reject	B. regard	C. represent	D. religion
10.	A. prb	B. lamb	C. limb	D. climb
câu	sau:			eó gạch chân của các  practice because those  C
	clothes that m pe	rson likes <u>are ra</u>	rely the ones that f	it him or her.
12.	Because they ha	d spent too ma		g the new contract, the
	A	В	C	
	students lost the	opportunity to r	rent the apartment.	
		D		
13.	These televisions	are all too expe	ensive for we to buy	at this time.
	A	В	C	D
14.	After she had bo	ught <u>himself</u> a n B	ew automobile, <u>she</u>	sold her bike.
15.	The next imports		eve to decide is when	do we have to submit the
	proposal. A		В	C D
16.	George has not c	ompleted <u>the as</u>	signment yet, and M	laria <u>hasn't either</u> .
	A		B C	D
17.	John decided to be	y in the morning	a new car, but in the	afternoon he changed his
	mind. A	В		C D
18.	Some of the plan	ts in this store	require very <u>little ca</u> B	re, but this one needs
	much more sunli	ght than the oth	ners ones.	
	С		D .	an .
19.	After George had	l returned to his	house, he was read	ing a book.
			B C D	
20.	Many theories of	on conserving t	he purity of water	has been proposed but
	not one has been	n <u>as widely acce</u>	pted as this one.	

III.	Chọn phương át	n tốt nhất :		
21.	It's time you	to study seriousl	У	
	A. begin	B. began	C. did begin	D. would begin
22.	A citizen should v	work for the	benefit of mankind	
	A. devote	B. devoted	C. devotedly	D. more devotedly
23.	Examinations ma	ke me I alv	vays get	
	A. angry / being r	ervous	C. angrily / nervo	us
	B. anger / nervous	sły .	D. angry / nervous	5
24.	Wait; I'm	finishing the letter.		
		B. one minute		D. minute
25.	Here is the man	my brother i	s going to	
		ter / marry		ter / marry to
		r / marry with		
26.	***	begin reading		·
	A. unless he does	n't have time	C. unless he has p	plenty of time
	B. if he has plent;	y of time	D. unless he has i	no time
27.	The fewer bags yo	ou take, trou	ble you will have er	1-route.
	A. the fewer	B, the little	C. the less	D. the least
28.	Ancient civilization	ons were not aware t	that the Earth	a sphere.
	A. is	B. was	C. had been	D. has been
29.	How since	e we school?		
	A. are you / left		C. were you / left	
	*	/ have left		/ left
30		works I respect hig		
		B. whose		
		u và chọn một từ		
~				bout six months ago,
				d at me and asked a

me (	39) the win	idow. I'm glad my bed	aroom is on the (40)	
31.	A. in the bed for	B. in the bed since	C. in hed for	D. in bed since
32.	A. felt	B. filled	C. fell	D. feel
		B. to see		
				D. too much hardly
				D. eat or drank
36.		B. said me		
		B. would		
		B. every days		
		B. along		
411	A. Hat ground	/B. ground flat	t. Hoor ground	17. ground Hoor

### V, Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi :

According to the best evidence gathered by space probes and astronomers, Mars is an inhospitable planet, more similar to Earth's Moon than Earth to itself - a dry, stark, seemingly lifeless world. Mars' air pressure is equal to Earth's at an altitude of 100,000 feet. The air there is 95 percent carbon dioxide. Mars has no ozone layer to screen out the sun's lethal radiation. Daytime temperatures may reach above freezing, but because the planet is blanketed by the mere wisp of an atmosphere, the heat radiates back into space. Even at the equator, the temperature drops to -50 degree Celsius at night. Today there is no liquid water, although valleys and channels on the surface show evidence of having been carved by running water. The polar ice caps are made of frozen water and carbon dioxide, and water may be frozen in the ground as permafrost. Despite these difficult conditions, certain scientists believe that there is a possibility of transforming Mars into a more Earth-like planet. Nuclear reactors might be used to melt frozen gases and eventually build up the atmosphere. This is turn could create a "greenhouse effect" that would stop heat from radiating back into space. Liquid water could be thawed to form a polar ocean. Once enough ice has melted, suitable plans could be introduced to build up the level of oxygen in the atmosphere so that, in time, the planet would support animal life from earth and even permanent human colonies. "This was once thought to be so far in the future as to be irrelevant," said Christopher Mckay, a research scientist at the National Aeronautics and Space Administration. "But now it's starting to look practical. We could begin work in 4 or 5 decades." The idea of "terra-forming" Mars has its roots in science fiction. But as researchers develop more profound understanding of how it may be possible to create similar conditions on Mars. The process could take hundreds of even thousands of years to complete and the cost would be staggering.

- 41. With which of the following is the passage primarily concerned.
  - A. The possibility of changing the Martian environment.
    - B. The challenge of interplanetary travel.
    - C. The advantages of establishing colonies on Mars.
    - D. The need to study the Martian ecology.
- 42. The word "there" underlined refers to \_\_\_\_\_.
  - A. a point 100 miles above the Earth / C. Mars
  - B. the Earth's Moon D. outer space
- 43. Which of the following does the author NOT list as a characteristic of the planet Mars that would make colonization difficult?
  - A, There is little liquid water.
  - / B. Daytime temperatures are dangerously high.
    - C. The sun's rays are deadly.
    - D. Night-time temperatures are extremely low.

### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi :

Although speech is the most advanced form of communication, there are many ways of communicating without using speech. Signals, signs, symbols and gestures may be found in every known culture. The basic function of a signal is to impinge upon the environment in such a way that it attracts attention, as, for example, the dots and dashes of a telegraph circuit. Coded to refer to speech, the potential for communication is very great. Less adaptable to the codification of words, signs also contain meaning in and of themselves. A stop sign or a barber pole conveys meaning quickly and conveniently. Symbols are more difficult to describe than either signals or signs because of their intricate relationship with the receiver's cultural perceptions. In some cultures, applauding in a theatre provides performers with an auditory symbol of approval. Gestures such as a waving and handshaking also communicate certain cultural messages. Although signals, signs, symbols, and gestures are very useful, they do have a major disadvantage. They usually do not allow ideas to be shared without the sender being directly adjacent to the receiver. As a result, means of communication intended to be used for long distances and extended periods are based on speech. Radio, television and the telephone are only a few.

inte	ng directly adjacent to the receiver. Inded to be used for long distances and io, television and the telephone are only	extended period							
41.	Which of the following would be the best title for the passage?								
	A. Signs and signals B. Gestures / C. Communication D. Speech								
42.	What does the author say about speed	h?							
	A. It is the only true form of communi	cation.							
	B. It is dependent true on the advance	s made by inven	tors.						
	C. It is necessary for communication t	o occur.							
	D. It is the most advanced form of cor	nmunication.							
43.	According to the passage, what is a si	gnal?							
	A. The most difficult form of communi	cation to describe	в.						
	B. A form of communication which ma	y be used across	long distances.						
1	C. A form of communication that inter								
	D. The form of communication most re								
44.	The phrase "impinge upon" is closest								
1	A. intrude B. improve	C. vary	D. prohibit

### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi:

The influenza virus is single molecule composed of millions of individual atoms. Though bacteria can be considered a type of plant, secreting poisonous substances into the body of the organism, they attack viruses, like the influenza virus, are living organisms themselves. We may consider them regular chemical molecules since they have strictly defined atomic structure; but on the other

hand, we must consider them as being alive since they are able to multiply in unlimited quantities. An attack brought on by the presence of the influenza virus in the body produces a temporary immunity, but, unfortunately, the protection is against only the type of virus that caused the influenza. Because the disease can be produced by any one of three types, referred to as A, B or C, and many strains within each type, immunity to one virus will not prevent infection by another type or strain. Every ten years, worldwide epidemics of influenza called pandemics occur. Thought to be caused by new strains of type-A virus; these pandemic viruses have spread rapidly, inflecting millions of people. Epidemics or regional outbreaks have appeared on the average every two or three years for type-A virus, and every four or five years for type-B virus.

type or strain. Every ten years, world	dwide epidemics of influenza called
pandemics occur. Thought to be caused b	by new strains of type-A virus; these
pandemic viruses have spread rapidly, infl	ecting millions of people, Epidemics or
regional outbreaks have appeared on the	average every two or three years for
type-A virus, and every four or five years for	or type-B virus.
41. With what topic is the passage primar	rily concerned?
/ A. The influenza virus.	C. Bacteria.
B. Immunity to disease.	D. Chemical molecules.
42. According to this passage, bacteria are	3
A. poisons B. very small	C. larger than viruses \D. plants
43. The word "themselves" underlined refe	ers to
A. molecules B. bacteria	C. substances D. viruses
44. The word "strictly" underlined could be	
A. unusually B. completely	· ·
45. Why does the writer say that viruses a	
A. They have a complex atomic structu	
B. They move.	D. They need warmth and light.
46. The atomic structure of viruses	
A. is variable	
√ B. is strictly defined	•
C. cannot be analysed chemically	
D. is more complex than that of bacter	ria
47. The word "unlimited" underlined cou	ild best be replaced by which of the
following	
A. very small B. very large	C. very similar D. very different
48. How does the body react to the influen	za virus?
A. It prevents further infection to other	r types and trains of the virus.
B. It produces immunity to the type ar	nd strain of virus invading it.
C. It becomes immune to types A, B as	nd C viruses, but not to various strains
within the types.	
D. After a temporary immunity it bec	omes more susceptible to the type and
strain that caused the influenza.	
19. The author names all a me following	as characteristics of pandemics except
•	
	C. they are regional outbreaks
B. they are caused by type - A virus	
50. The word "strains" is closest in meani	
A. theories B. injuries	C. varieties D. weaknesses

V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi :				
A team of Russian scientists has challenged the theory that the woolly				
mammoths became extinct 10,000 years ago at the end of the Ice Age. The				
scientists have reported that the beasts may have survived until 2000 B.C on an				
island off the coast of Siberia, where researchers uncovered 29 fossilized woolly				
mammoth teeth ranging in age from 4,000 to 7,000 years. The question to be				
asked now is how these prehistoric pachyderms survived in their island				
environment. One possibility is that they adapted to the confined surroundings				
by decreasing their bulk. This theory is based on their smaller tooth size, which				
has led scientists to believe that they were only 6 feet tall at the shoulder				
compared with the 10 feet of their full-sized counterpart. But would this be				
enough to enable them to survive thousands of years beyond that of other				
mammoths? Researchers are still working to uncover the reasons for this				
isolated group's belated disappearance.				
41. With which topic is this passage mainly concerned?				
A. Some scientists have challenged a theory.				
B. Some small teeth have been discovered.				
C. Some mammoths lived longer than others.				
D. Some pachyderms survived on an island.				
42. According to the passage, some researchers suggest that mammoths became				
extinct about				
	A. 2,000 years ago	0	C. 7,000 years age	0
	B. 4,000 years ago	0	D. 10,000 years a	go '

Amy tan, the American - born daughter of Chinese emigrants received the Commonwealth Club gold Award in 1989 for the first work of fiction, the best-selling JOY LUCK CLUB. The sixteen interrelated stories that constitute the work alternate between the tales of four Chinese immigrant mothers and their Americanized daughters, in an exploration of the generational and cultural tensions experienced by mane first-generation daughters of immigrants. Tan's parents, like many immigrants, had high expectations for their children and often set confusing standards, expecting Amy and her two brothers to think like Chinese but to speak perfect English, excel academically, and take advantage of every circumstance that might lead to success. Tan, however, rebelled against her parents 'expectations, which included such exalted professions as neurosurgery and devoted herself to being thoroughly American and dreaming of being fiction writer – Tan obtained a Bachelor's degree in English and linguistics and a master's degree in linguistics and eventually established herself

as a highly successful business writer. Tan, however, was not satisfied despite her material success. Turning to her life long dream, she wrote her first short story "Endgame", and them a second, "Waiting between the trees." In 1987, Tan visited her half sisters in China with her mother, a trij that proved to be a turning point in her life and career. Tan felt a sense of completeness, a bonding with the country and its culture that she had never expected Returning from China, Tan was surprised to learn that on the strength of her short stories, she had received an advance from a publisher. Tan closed her business and wrote the remaining stories for the JOY LUCK CLUB. It was a resounding success, well received by the critics and appearing on the New York Times bestseller list. It has been translated into 17 languages, including Chinese, and was made into a movie in 1993.

### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi:

Today's cars are smaller, safer, cleaner and more economical than their predecessors, but the car of the future will be far more pollution-free than those on the road today. Several new types of automobile engines have already been developed that run on alternative sources of power such as electricity, compressed natural gas, methanol, steam, hydrogen, propane. Electricity, however, is the only zero-emission option presently available.

Although electric vehicles will not be truly practical until a powerful, compact battery or another dependable source of current is available, transportation experts foresce a new assortment of electric vehicles entering everyday life: shorter-range commuter electric cars, three-wheeled neighbourhood cars, electric delivery vans, bikes and trolleys. As automakers work to develop practical electric vehicles, urban planners and utility engineers are focusing on infrastructure systems to support and make the best use of the new cars. Public charging facilities will need to be as common as today's gas stations. Public parking spots on the street or in commercial lots will need to be equipped with devices that allow drivers to charge their batteries while they stop, dine, or attend a concert. To encourage the use of electric vehicles, the most convenient parking in transportation centers might be reserved for electric car. Planners foresee electric shuttle buses, trains, buses and neighbourhood vehicles all meeting at transit centers that would have facilities for charging and renting. Commuters will be able to rent a variety of electric cars to suit their needs: light trucks, on-person-three-wheelers, small cars or gasoline hybrid cars for longer trips which will certainly take place on automated freeways capable of handling five times the number of vehicles that can be carried by a freeway today.

41. The following electric vehicles are all mentioned in the passage EXCEPT

A. trolleys

B. trains

C. vans

D. planes

#### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỗi :

The food we eat seems to have profound effects on our health, Although science has made enormous steps in making food more fit to eat, it has, at the same time, made many foods unfit to eat. Some research has shown that perhaps 80 percent of all human illnesses are related to diet and 40 percent of cancer is related to the diet as well, especially cancer of the colon. People of different cultures are more prone to contract certain illnesses because of the characteristic foods they consume. That food is related to illnesses, that is not a new discovery. In 1945, government researchers realized that nitrates and nitrites (used to preserve colour in meat) as well as other food additives caused cancer. Yet, these carcinogenic additives remain in our food, and it becomes more difficult all the time to know which ingredients on the packaging labels of processed food are helpful or harmful. The additives that we eat are not all so direct. Farmers often give penicillin to cattle and poultry, and because of this, penicillin has been found in the milk of treated cows. Sometimes similar drugs are administered to animals not for medicinal purposes, but for financial reasons. The farmers are simply trying to fatten the animals in order to obtain a higher price on the market. Although the Food and Drug Administration has tried repeatedly to control these procedures, the practices continue. A healthy diet is directly related to good health. Often we are unaware of detrimental substances we ingest. Sometimes well meaning farmers or others who do not realize the consequences add these substances to food without our knowledge.

- 41. How has science done a disservice to people?
  - A. Because of science, disease caused by contaminated food has been eradicated.
  - B. It has caused a lack of information concerning the value of food.
  - √C. As a result of scientific intervention, some potentially harmful substances.

    have been added to our food.
    - D. The scientists have preserved the colour of meats but not of vegetables
- 42. The word "prone" underlined is nearest in meaning to\_\_\_\_\_.

  A. supine B. unlikely C. healthy D. predisposed
- A. supine B. unlikely
  43. What are nitrates used for?
  - A. They preserve flavour in packaged foods.
  - √ B. They preserve the colour of meats.
    - C. They are the objects of research.
    - D. They cause the animals to become fatter.

#### V. Đọc đoạn văn mu và chọn câu trả lời phù hợp cho các câu hỏi :

Elizabeth Blackwell was born in England in 1821 and emigrated to New York City when she was 10. One day, she decided that she wanted to become a doctor. That was nearly impossible for woman in the middle of the 19th century. After writing many letters seeking admission to medical schools, she was finally accepted by a doctor in Philadelphia. So determined was she that she taught at school and gave music lessons to earn money for her tuition. In 1849, after graduation from medical school, she decided to further education in Paris. She wanted to be surgeon, but a serious eye infection forced her to abandon the idea. On returning to the United States, she found it difficult to start her own practice because she was woman. By 1857, Elizabeth and her sister, also a doctor, along with another female doctor, managed to open new hospital, the first for women and children. Besides being the first female physician in the United States and founding her own hospital, she also established the first medical school for women.

- 41. Why couldn't Elizabeth realize her dream of becoming a surgeon?
  - A. She couldn't get admitted to medical school.
  - B. She decided to further her education in Paris.
  - / C. A serious eye infection halted her quest.
    - D. It was difficult for her to start a practice in the United States.
- 42. What main obstacle almost destroyed her chances for become a doctor?
  - V A. She was a woman.
    - B. She wrote too many letters.
    - C. She couldn't graduate from medical school.
    - D. She couldn't establish her hospital.
- 43. How many years elapsed between her graduation from medical school and the opening of her hospital?
  - A. 8 B. 10 C. 19 D. 36

#### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi :

The sun today is a yellow dwarf star. It is powered by thermonuclear reactions near its centre that change hydrogen into helium. The sun has existed in its present state for about 4 billion 600 million years and is thousands of times larger than the earth. By studying other stars, astronomers can predict what the rest of the sun's life will be like. About 5 billions year from now, the core of the sun will shrink and become hotter. The surface temperature will fall. The higher temperature of the centre will increase the rate of thermonuclear reactions. The outer regions of the sun will expand 35 million miles, about the distance to Mercury, which is the closest planet to the sun. The sun will then be a red giant star. Temperatures on the earth will become too hot for life to exist. Once the sun has used up its thermonuclear energy as a red giant, it will begin to shrink. After it shrinks to the size of the earth, it will become a white dwarf star. The sun may throw off huge amounts of gases in violent eruptions called nova explosions as it changes from a red giant to a white dwarf. After billions of years as a white dwarf, the sun will have used up all its fuel and will have lost its heat. Such a star is called a black dwarf. After the sun has become a black dwarf, the earth will be dark and cold. If any atmosphere remains there, it will have frozen onto the earth's surface.

- 41. What is the main purpose of this passage?
  - A. To alert people to the dangers posed by the sun.
  - B. To discuss conditions on earth in the far future.
  - C. To present theory about red giant stars.
  - D To describe changes that the sun will go through.
- 42. It can be inferred from the passage that the sun\_\_\_\_\_
  - A is approximately halfway through its life as a yellow dwarf.
    - B. has been in existence for 10 billion years.
  - C. is rapidly changing in size and brightness.
  - D. will continue as a yellow dwarf for another 10 billion years.
- 43. What will probably be the first stage of change as the sun becomes red giant?
  - A. Its core will cool off and use less fuel."
  - B. Its surface will become hotter and shrink.
  - C. Its sun will throw off huge amounts of gases.
  - D. Its center will grow smaller and hotter.
- 44. When the sun becomes a red giant, what will conditions be like on earth?
  - A. Its atmosphere will freeze and become solid.
  - B. It will be enveloped in the expanding surface of the sun.
  - C) It will become too hot for life to exist.
  - D. It will be destroyed in nova explosions.
- 45. As a white dwarf, the sun will be\_\_\_\_\_
  - A. the same size as the planet Mercury.
  - By thousands of times smaller than it is today.
  - C. around 35 million miles in diameter.
  - D. cold and dark.
- 46. According to the passage which sequence of stages is described as the sun will probably pass through?
  - A. Yellow dwarf, white dwarf, red giant, black giant.
  - B. Red giant, white dwarf, red dwarf nova explosion.

C. Yellow dwarf, red giant, white dwarf, black dwarf D. White dwarf, red giant, black dwarf, yellow dwarf. 47. The word "there" underlined refers to A. our own planet. C. the core of a black dwarf. B. the outer surface of the sun. D. the planet Mercury. 48. Which of the following best describes the tone of the passage? A. Alarmed. B. Comic. C. Objective. D. Pessimistic. 49. The word "dwarf" is closest meaning to A. someone or something is much C. prevention of full growth smaller than the normal size B. a man with magic power D. a small halloon 50. The word "thermonuclear" is closest meaning to D. a small balloon A. of nuclear testing. B. of nuclear energy. C. of nuclear reactions occurring at D. of nuclear winter. very high temperature. **ANSWER KEY - TEST 14** ABCD ABCD ABCD ABCD 000 14. 0 0 0 0 27. 0 0 0 0 40.0 • 0 0 0 0 0 15.0000 28. ● ○ ○ ○ 41.0000 29. 0 • 0 0 3. 0 0 • 0 16.0000 42. ● ○ ○ ○ 4. 0 0 0 0 17.0 0 0 0 43.0000 30, ○ ○ ● ○ 31. ○ ○ ● ○ 5. 0 0 • 0 18. 0 • 0 0 44.0000 000 19.0000 32. ○ ● ○ ○ 45. 0 • 0 0 7. 0000 20. 0 0 0 0 33. ● ○ ○ ○ 46.00000 21. 0 0 0 0 47. 0 0 0 0 B. 0 • 0 0 34. 0 0 0 • 9. • 0 0 0 22. 0 • 0 0 35. ○ ● ○ ○ 48.00000 10. ○ ○ ● ○ 23. 0 • 0 0 36. ● ○ ○ ○ 49. • 0 0 0 11. 0 0 0 0 24. ○ ○ ● ○ 37.0000 50. 0 0 • 0 **12.** • 0 0 0 25. 0 • 0 0 38. 0 0 • 0 26. ● ○ ○ ○ 39. 0 0 0 • 13. 0 • 0 0

### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi :

When the first white men came to America, they found vast amounts of natural resources of tremendous value. Forests covered a large part of the nation; later gas, oil and minerals were found in unbelievable amounts. There was a great abundance of very fertile soil. Forest, prairies, streams, and rivers abounded with wildlife. So vast were those resources that it seemed that they could never be used up. So forests were destroyed to make way for farmland. Grassland and prairies were powed and harrowed. Minerals and oil were used in

great quantities to supply a young industrial ration. Almost every river became the scene of factories, mills and power companies. Mammals and birds were slaughtered for food and sports. Within a short time, the results were obvious. Floods caused millions of dollars' worth of damage yearly. The very fertile soil washed away or blew up in great clouds. The seemingly in exhaustible oil and minerals showed signs of depletion. Rivers were filled with silt from eroding farms and wastes from factories. Many of the rivers were made unfit for fish. Several species of birds disappeared, and some mammals seemed on the verge of going. Future timber shortages were predicted. In short, Americans soon came to realize that some sort of conservation program must be set up, if future, as well as present, Americans were to share in the resources that are the heritage of every American.

realize that some sort of conservation program must	be set up, if future, as well
as present. Americans were to share in the resource	es that are the <u>heritage</u> of
every American.	
41. The title below that best expresses the main idea	of this selection is
A, what the first white men found in America.	
B. the cause of timber shortages.	
C. the loss of topsoil.	
D) the story of America's natural resources.	
42. It seemed to the early American settlers that	and the second
A. game was scarce	-
B. forests should not be cut	*
C, the natural resources were inexhaustible	
D. there was a shortage of minerals	
43. The use of America's natural resources by the ear	
A carcless B. scientific C. unbelie	vable D. predicted
44. Much of the fertile soil of America has	
A. sunk deep into the earth C. been co	× (
B. been eroded by wind and water D. become	the scene of factories
45. One reason many of our rivers are no longer suit	able living places for fish is
that	
A, too many fish have been caught	
B. floods have caused much damage	
C a conservation program has been set up	
(D.)factories have dumped waste into the rivers	
46. Another word for "fertile" is	
A, wet B, productive C, useful	D. irrigated
47. Another word for "slaughtered" is	
A. killed B. caught C. reared	D. wounded
48. Another word for "verge" is	
A. peak B. brink C. occasion	D. possibility
49. The word "inexhaustible" is closest meaning to	V
A. boundless B. uncountable C. very tired	D. that cannot be used up
50. The word "heritage" is closest meaning to	
A. ownership	B. possession
C. Things have been passed on from earlier gener	ations D. property

#### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi:

As the horizons of science have expanded, two main groups of scientists have emerged. One is the pure scientist; the other, the applied scientist. The pure or theoretical scientist does original research in order to understand the basic laws of nature that govern our world. The applied scientist adapts this knowledge to practical problems. Neither is more important than the other, however, for the two groups are very much related. Sometimes, however, the applied scientist finds the "problems" for the theoretical scientist to work on. Let's take a particular problem of the aircraft industry: Heat-resistant metals. Many of the metals and alloys which perform satisfactorily in a car cannot be used in a jet-propelled plane. New alloys must be used, because the jet engine operates at a much higher temperature than an automobile engine. The turbine wheel in a turbojet must withstand temperatures as high as 1,600°F, so aircraft designers had to turn to the research metallurgist for the development of metals and alloys that would do the job in jet-propelled planes. Dividing scientists into two groups in only one broad way of classifying them, however. When scientific knowledge was very limited, there was no need for men to specialize. Today, with the great body of scientific knowledge scientists specialize in many different fields. Within each field, there is further subdivision. And with finer and finer subdivisions, the various sciences have become more and more interrelated until no one) branch is entirely independent of the others. Many new specialities geophysics and biochemistry, for example - have resulted from combining the knowledge of two or more sciences.

41.	Doing original research to understand the basic laws of na	ture is the job	of
		Both A and B	
42.	The applied scientist		
	A. does original research to understand the basic laws of na	ture	
	B. applies the results of research to practical problems		
	C. provides the basic knowledge for the pure scientist	‡	
	D. is not interested in practical problems		

43,	Concerning the relative importance of pure and applied scientists, the writer						
	A. applied scientists are more important						
	B. pure scientists are more important						
	C. neither are important						
	D. Both are important						
44.	The example given in "sometimes planes" illustrates how						
	A. pure science operates independently of applied science						
	B. the applied scientist discovers the basic laws of nature						
	C. applied science defines all the areas where basic research is done						
	D applied science suggests problems for the basic scientist						
45.	The problem discussed in "sometimes planes" called for						
	A. selecting the best heat - resistant metal from exiting metals						
	B. developing a turbine wheel capable of generating heat up to 1,600°F						
	C. developing metals and alloys that would withstand terrific temperatures						
	D. causing the jet engine to operate at higher temperatures						
46.	The temperature of 1,600°F is						
	A. reached by today's high-powered automobile engines						
	B. that which the metal used in today's automobile engines						
	C) that at which a jet engine may operate						
	D. that at which a jet engine burns out						
47.	In the example given, the aircraft designer represents the						
	(A) applied scientist  B. pure scientist						
	C. non-scientist D. skilled mechanic						
48.	Finer and finer subdivision in the field of science has resulted in						
	A. the eradication of the need for specialists						
	B. greater interdependence of all the various sciences						
	C. greater interdependence of each science						
	D. the need for only one classification of scientists						
49.	"Geophysics and biochemistry" underlined are						
	A. examples of new specialities resulting from combining sciences						
	B. totally dependent sciences						
	C. among the oldest sciences known to man						
	D. Both B and C						
50.	"The horizons of science have expanded" underlined means that						
	A. scientists can see further out into space						
	B science has developed more fields of endeavour						
	C. the horizon changes size from year to year						
	D. scientists have made a machine for enlarging the horizon

### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi:

In order to learn to be one's true self, it is necessary to obtain a wide and extensive knowledge of what has been said and done in the world; critically to inquire into it; nearly to sift it, and earnestly to carry it out. It matters not what you learn, but when you once learn a thing, you must never give it up until you have mastered it. It matters not what you inquire into, but when you inquire into a thing, you must never give it up until you have completely understood it. It matters not what you try to think out, but when you once try to think out a thing, you must never give it up until you have got what you want. It matters not what you try to sift out, but when you once try to sift out a thing, you must never give it up until you have sifted it out clearly and distinctly. It matters not what you try to carry out, but when you once try to carry out a thing, you must never give it up till you have done it completely and well. If another man succeeds by one effort, you will use a hundred efforts. If another man succeeds by ten efforts, you will use a thousand efforts.

#### V. Đọc đoạn văn sau và chọn câu trá lời phù hợp cho các câu hỏi :

Every year scientists open more doors that lead to the secrets of new beneficent drugs. There is bacitracin, which was discovered by two scientists at Columbia University's college of physicians and surgeons. These two people, Dr. Frank Meleney and Miss Balbina Johnson, knowing that the human body had some kind of action in itself with which it fights infections, began to search for the chemical that does this. In the hospital, they examined badly infected wounds of people who had been hurt in accidents and made tests of the blood and the infected tissue. Finally, in the wound of a girl who had broken a leg bone, they found the useful germs which seemed to be fighting the poisonous infection. They took some of these into the laboratory and from them developed cultures; that is, larger masses of the germs with which to experiment. At last, after long and painstaking work, they were able to draw from these germs a substance which is a germ destroyer. Dr. Meleney and Miss Johnson named it bacitracin - baci because the germ is, in scientific language, a bacillus and tracin for Margaret Tracy, whose broken leg supplied the germ. Bacitracin at first was used only locally; later the drug was developed into a solution that can be used to fight germs through the blood stream.

41.	Today, the discovery of a new drug oc	curs
	A. very seldom	C once every 10 years
	B. once in a generation	D. frequently
42.	Bacitracin was discovered by	<u></u>
	A. Miss Margaret Tracy	C. Dr. Frank Meleney
	B. Miss Balbina Johnson	D. Both B and C
43.	The scientific term for the action	with which the human body fights
	infection is	1
	A. drug B. biotic	C. not mentioned D. Both A and B
44.	Searching for the fighting chemical, t	
	A. fresh wounds	C. only infected wounds
	(B.)infected wounds	D. only a few wounds
45.	Cultures, as used in this article, are_	****
	A, masses of germs	C. masses of infected tissue
	B. blood tests	D. poisonous germs
46.	Bacitracin	
	A. is poisonous	C, restores broken bones
	B) destroys germs	D. develops germs

V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi:

The term "satellite" presents an interesting study of word usage and definition when we trace it from its Latin origin through its historical development. We find that, although one of its meanings may be totally unlike another, an underlying relationship is apparent throughout its evolution. The word was first coined in ancient Rome, a metropolis which for a thousand years dominated the Roman Empire and reigned as the hub of Western civilization. Eventually, however, the very life of the Empire was threatened by economic unrest and a series of rapid changes in government. Matters reached such a state that no person of importance dared walk the streets of the capital without an escort. Many notables were surrounded by armed bodyguards; members of such a guard were known as satellites, from an old name for an attendant. Despite their satellites, one aristocrat after another was murdered. External difficulties multiplied, the Empire crashed and classical Latin ceased to be the language of commerce and science. But learned men revived the ancient tongue ten centuries later and used it for most formal speech. Among the resurrected terms was "satellite", which medieval rulers applied to their personal guards. Johannes Kepler thought of the king's satellites when he heard about the strange bodies revolving about Jupiter. Discovered by Galileo, the secondary planets hovered about the planet like guards and courtiers encircling a prince. So in 1611, Kelper named them satellites, soon the term was applied to all heavenly bodies that revolve about primary masses.

41.	The term "satellite"		
	A. has not changed in meaning	C. is related in al	ll its meaning
	B. is of uncertain origin		
42.	Rome's position as the center of civiliz		-

a. Many people believe that Americans love their cars almost more than anything else. It may be true. From the time, youngsters become 14 years old or even earlier, they are likely to start dreaming of having their own car. Many young people work after school during their last year at high school to save money to buy a car. Learning to drive and obtaining a driver's license may be one of the most exciting times of a young person's life. People who do not like to go to m doctor when they are ill will take their cars to a mechanic at the first sign of a problem. Those who do not like to work around the home on Saturday may devote most of that day to washing and waxing their cars. Many men and women in the United States need to have cars. People need cars to go to work in. Housewives need cars to go shopping or to take the children to school or for other activities. That is why many families have 2 or 3 cars. In most states, young people learn to drive in high school, where driver training is one of the most popular courses. At the end of the course, the student must take a driving test to obtain a license. For many, that piece of paper is an important symbol that they are now adults.

41.	What do many people believe?
	A. Americans like their cars best
	B) Americans prefer their cars to anything else
	C. Most Americans have more cars than anything else
	D. Only some Americans prefer their cars to anything else
12.	What is one of the most exciting times of a young person's life?
	A. The time when they have a car
	B. The time when they've learned to drive and obtained a license
	C. The time when they've learned how to drive
	D. The time when they get a license
43.	What do many people devote most of their Saturday to?
	A. Cleaning and polishing cars C. Repairing roofs
	B. Planting trees D. painting houses
44.	Where do some boys and girls learn to drive?
	A. In church B. In a club C. In high school D. In college
45.	A driver's license is important to many students because
	A. they need to show it to their teachers
	B. they need to show it to their parents
1	C it shows that they are adults
Į.	D. it shows that they are school-leavers
	b. Man is a land animal, but he is also closely tied to the sea. Throughout
hist	ory, the sea has served the man's needs. The sea has provided man with food
	a convenient way to travel to many parts of the world. Today, nearly two
	ds of the World's population live within 80kms of the sea coast. In the
	ern technological world, the sea offers many resources to help mankind
SULL	ive. Resources on land are beginning to be used up. The sea, however, still
can	he hoped to supply many of man's needs. The list of riches of the sea to be
deve	loped by man's technology is impressive. Oil and gas explorations have been
	ied out for nearly 30 years. Valuable amounts of minerals exist on the ocean-
floor	ready to be mined. Fish farming promises to be a good way to produce large
•	ntities of food. The culture of fish and shellfish is an ancient skill practised in
	past mainly by Oriental people. Besides oils, and gas, the sea many offer new
	ces of energy. Experts believe that the warm temperature of the ocean can
	sed as the steam in a steam ship. Ocean currents and waves offer use as a
	ce of energy. Technology is enabling man to explore more deeply under the
	The development of strong, new materials has made this possible. The
	nology to harvest the sea continues to improve. Experts believe that by the
	2010, the problems that prevent us from exploiting fully the food, minerals
	energy sources of the sea will be largely solved.
46.	The major things that the sea offers man are
	A. fish and oil C. warm temperature and ocean current
417	B. minerals and oil D/the food, energy sources and minerals
17.	The sea serves the needs of man because
	A. it provides man with food C. it supplies man with minerals
	B. it offers oil to man D. All of the above

48. We can conclude from the passage that A. the sea resources have largely been used up B. the sea has not yet been developed. C. the problems preventing us from using marine sources have been solved (D) by the year 2010, the technology will be good enough to exploit all 49. The "Oriental people" underlined means \_\_\_\_\_. #### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi:

a. In the United States, it is not customary to telephone someone very early in the morning. If you telephone him early in the day, while he is shaving or having breakfast, the time of the call shows that the matter is very important and required immediate attention. The same meaning is attached to telephone calls made after 11:00 p.m. If someone receives a call during sleeping hours, he assumes it's a matter of life and death. The time chosen for the call communicates its importance. In social life, time plays a very important part. In the U.S, guests tend to feel they are not highly regarded if the invitation to a dinner party is extended only 3 or 4 days before the party date. But it is not true in all countries. In other areas of the world, it may be considered foolish to make an appointment too far in advance because plans which are made for a date more than a week tend to be forgotten. The meaning of time differs in different parts of the world. Thus, misunderstandings arise between people from cultures that treat time differently. Promptness is valued highly in American life. If people are not prompt, they may be regarded as impolite or not fully responsible. In the · U.S. no one would think of keeping a business associate waiting for an hour, it would be too impolite. A person who is 5 minutes late is expected to make a short apology. If he is less than 5 minutes late, he will say a few words of explanation, though he will not complete the sentence.

41.	The word	"attached"	underlined	means	
	A. taken		B. drawn	👵 C. given	D. shown

- 42. Supposing one wants to make a telephone call at dawn, this means
  - A. the matter is important B. the matter is somewhat important
  - VC. the matter requires immediate attention D. it's a matter of life and death
- 43. According to this passage, time plays important role in \_\_\_\_.

  A. everyday life B. school life C. communications D. private life
- 44. The best title for this passage is \_\_\_\_\_.
- × A. The Voices of Time C. The Importance of an Announcement
  - J. B. The Importance of Time D. Time and Tide Wait for No Man
- 45. According to the passage, the author of the article may agree to which of the following statement?
  - A. It's appropriate to send your invitation eards three or four days before a dinner party date in the U.S.,
  - B. It may be appropriate to send your invitation cards to your guests three or four days before a dinner party date in some cultures.
  - C. It's best for one to make telephone calls at night because it costs much less.
  - D. If one is less than 5 minutes late, he has to make a short apology.

American cities are similar to other cities around the world. In every country, cities reflect the values of the culture. Cities contain the very best aspects of a society: Opportunity for education, employment, and entertainment. They also contain the very worst parts of a society: Violent crime, racial conflict and poverty. American cities are changing, just as American society is changing. After World War II, city residents became wealthier, more prosperous. They had more children. They needed more space. They moved out of their apartments in

ý

the city to buy their own homes. They bought houses in the suburbs, areas near a city where people live. These are areas without many offices or factories. During the 1950's, the American "dream" was to have a house in the suburbs. Now things are changing. The children of the people who left the cities in 1950's are now adults. They unlike their parents, want to live in the cities. Many young professionals, doctors, lawyers and executives are moving back into the city. Many are single, others are married, but often without children. They prefer the city to the suburb because their jobs are there; they are afraid of the fuel shortage or they just enjoy the excitement and opportunities which the city offers. A new class is moving into the city – a wealthier more mobile class. Only a few years ago, people thought the older American cities were dying. Some city residents now see a bright, new future. Others see only problems and conflicts. One thing is sure: Many dying cities are alive again.

#### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi :

a. In sport the sexes are separate. Women and men do not run or swim in the same races. Women are less strong than men. That at least is why people say. Women are called "the weaker sex," or, if men want to please them, the "fair sex". But boys and girls are taught together at schools and universities. There are women who are famous Prime Ministey, scientists and writers. And women live longer than men. A European woman can expect to live until the age of 74, ■ man only until he is 68. Are women's bodies really weaker? The fastest men can run a mile in under 4 minutes. The best women need 4.5 minutes. Women's times are always slower than men's, but some facts are surprised. Some of them swam 400 meters in 4 minutes 21.2 seconds when she are only 16. The first "Tarzan" in films was an Olympic swimmer, Johnny Weissmuller. His fastest 400 meters was 4 minutes 59.1 seconds slower than a girl 50 years later! This does not mean that women are catching men up. Conditions are very different now, and sport is much more serious. It is so serious that some athletes are given hormone injections. At the Olympics, a doctor has to check whether the women athletes are really women or not. It seems said that sport has such problems. Life can be very completed when there are two separate sexes.

41.	Women	are	called	91	the	weaker	sex"	because	
-----	-------	-----	--------	----	-----	--------	------	---------	--

- A. women do as much as men
- /B. people think women are weaker than men
  - C. sport is easier for men than for women
  - D. in sport, the two sexes are always together
- 42. Which of the following is true?
  - A. Boys and girls study separately. \( \sqrt{B}\). Women do not run in races with men.
  - C. Famous Prime Ministers are women.
    - D. Men expect to live longer than women in Europe.
- 43. "That at least is why people say." underlined means people \_\_\_\_\_.
  - A. say other things, too

C. say this but may not think so

B. don't say this much D. only think this

- 44. What problems does sport have?
  - A. Some women athletes are actually men.
  - B. Some women athletes are given hormone injections.
    - C. Women and men do not run in the same race.
  - D. It is difficult to check whether women athletes are really women.

- 45. In this passage, the author implied that \_\_\_\_.

  A. women are weaker but faster than men
  - B. women are slower but stronger than men
  - C. men are not always stronger and faster than women
    - D. men are faster and stronger than woman
- b. Chess must be one of the oldest games in the world. An Arab traveller in India in the year 900 wrote that it was played long ago. Chess was invented in India, and has been played everywhere from Japan to Europe since 1400. The name "Chess" is interesting. When one player is attacking the other player's King, he says in English "check". When the King has been caught and cannot move anywhere, he says "check mate". These words come from Persian "Shah mat" means "the King is dead". That is when the game is over and one player has won. Such an old game changes very slowly The rules have not always been the same as they are now. For example, at one time, the Queen could only move one square at a time. Now she is the strongest piece on the board. It would be interesting to know why this has happened! Chess takes time and thought, but it is a game for all kinds of people. You do not have to be a champion to enjoy it. It is not always played by two people sitting at the same table. The first time the Americans beat the Russians was in a match played by radio. Some of the chess masters are able to play with many people at the same time.
- 46. Which of the following is known to be true?
  - A. Chess is an old Indian travelling game.
  - B. Chess is the oldest game.
  - C. Chess was played in Japan and Europe before 1400.
  - D. Chess was played in India long before 900.
- 47. One player has won the game when \_\_\_\_\_.
  - A. he attacks the other player's King
  - B. he says some Persian words
  - C. the other player's King cannot move anywhere
  - D. he says "check"
- 48. Which of the following will you hear when one player has won the game?

  A. "Shah mat"

  B. "Check"

  C. "the King is dead"

  D. "Check mate"
- 49. Which of the following is NOT correct.
  - A. All kinds of people can play chess.
  - B. Only two people can play chess at the same table.
  - C. Some people write each other playing chess.
  - D. The Russians lost the game by radio.
- 50. According to the old rules of the game \_\_\_\_\_.
  - A. the Queen was the strongest
  - B. the King had to be attacked all the time
  - C. the Queen could move no more than square at a time
  - D. the King could not move anywhere

	is of years before C		
American Indians	s entered North Ameri	ica by crossing a narro	ow strip of land that
once connected A	Maska and Siberia. T	he migrants entered	a new world where
there were no pe	eople at all. But there	were many animals	to hunt, and there
were forests wh	iere nuts, roots and	berries could be g	athered. When the
Europeans came	to the New World, the	Indians, at first, tau	ght the settlers how
to plant corn, ba	ke fish, make canoes	and smoke tobacco. I	n return, the whites
introduced horses	, guns, gun-powder, al	cohol. But at last, the	re were struggles for
land, and the str	uggles could have onl	y one result – war. V	When the wars were
over, all Indians	were moved to large	tracts of land called	reservations. Now,
some of them, em	bittered by past mistr	eatment, are determin	ned to preserve their
tribal life; some	wish to modernize tl	he reservations. Thes	e alternatives, with
many variations,	are what most Indi	ians have chosen -	a future in modern
technology and ed	lucation, or the revival	of ancient tradition a	ind treaties.
41. The Indians	entered North Americ	a	
A. with Colu		C. after Columbus	s' arrival
B. before Col	umbus	D. in 18th century	,

42. The Indians moved to a new world which was
A. once settled by Europeans
B. inhabited by primitive men
C. dwelled in by American migrants
/ D. completely uninhabited by other people
43. As soon as the Europeans set their foot on the New World, they
A. were hostile to the Indians
B. kept terms with the Indians
C. didn't treat the Indians in a friendly way
/ D. traced with the Indians friendly
44. The most accurate statement about contemporary Indians is
A. most Indians reject modern culture and technology
B. some Indians preserve conventional life style
C. some Indians have adopted modern culture and technology
√ D. Both B and C
45. The Indians were good at
A. struggle for land C. contemporary tribal life
C. making beats D. the revival of their tradition
b. There are three kinds of goals: short-term, medium - range and long term goals. Short-term goals usually deal with current activities, which we can apply on a daily basis. Such goals can be achieved in a week or less, or two weeks, or possibly months. It should be remembered that just as a building is not stronger than its foundation, our long-term goals cannot amount to much without the achievement of solid short-term goals. On completing our short-term goals we should date the occasion and then add new short-term goals that will build or those that have been completed. The intermediate goals build on the foundation of the short-range goals. They might deal with just one term of school or the entire school-year, or they could extend for several years. Any time you move step at a time, you should never allow yourself to become discouraged or overwhelmed. As you complete each step, you will enforce the belief in your ability to grow and succeed. And as your list of completion dates grow, your motivation and desire will increase. Long-range goals may be related to our dreams of the future. They might cover five years or more. Life is not a static thing. We should never allow a long-term goal to limit us or our course of action.
46 Our long town goals moon a lot
46. Our long-term goals mean a lot  ✓A. if we complete our short-term goals
B. if we cannot reach solid short-term goals C. if we write down the dates D. if we put forward some plans 47. New short-term goals are built upon A. two years  C. current activities
B. long-term goals D. the goals that have been completed

- 48. When we complete each step of our goals, B. we are overwhelmed A, we will win final success C. we should build up confidence of success D. we have strong desire for setting new gosalis 49. Once our goals are drawn up, ... A, we should stick to them until we complette them B. we may change our goals as we have new lideas and chances C. we'd better wait for the exciting news of success
  - D. we have made great decisions
- 50. It is implied but not stated in the passage that \_\_\_\_\_.
  - A. those who have long-term goals will succeed
  - B. writing down the dates may discourage you
  - · C. the goal is only a guide for us to reach our destination
    - D. everyone should have a goal

a. As Edith walked round the huge department store. She reflected how difficult it was to choose a suitable Christmas present for her father. She wished that he was as easy as her mother, who was always delighted with perfume. Besides, shopping at this time of the year was a most disagreeable experience: People trod on toes, poked you with elbows and almost knocked you over in their haste to get to a bargain ahead of you. Partly to have a rest, she paused in front of a counter where some attractive ties were on display. "They are real silk," the assistant assured her trying to tempt her. "Worth double the price." But she knew from past experience that her choice of ties hardly pleased her father. She moved on reluctantly and then quite by chance, stopped where a small crowd of men had gathered round a counter. She found some good quality pipes we sale and the prices were very reasonable. She did not hesitate for long though her father only smoked a pipe occasionally, she knew that this was present which was bound to please him. When she got home, with her small well-chosen present concealed in her handbag, her parents were already at the supper table. Her mother was in a cheerful mood. "Your father has at last decided to stop smoking," she informed her daughter.

41.	Edith's father

1	D. customers were doing their sho	pping i	n a hurry	

b. Indian and Inuit artists are now benefiting from the resurgence of interest in their art. More and more stores are opening up all the time as the quality of the art increases. In the West coast province of British Columbia alone, there are over 2,000 Indians making their living by producing arts and crafts. This resurgence has come at a good time. During the 1970's, there was a large demand for soapstone carvings, but this demand had the effect of inundating the market with mediocre work. Then, in the 80's, there was an economic slump in the industrial world. Those factors resulted in slow sales. Now, however, the new enthusiasm for both Indian and Inuit art has stimulated a higher quality work. Both Indian and Inuit have far more artists per capita than do the nonnative Canadians. One reason for this is that their culture had no written language before the arrival of white people. Instead, they expressed their culture and beliefs through drawing, carving, baskets. Art became a way of life. A second reason for the large number of artists is economic. Indians have been selling their arts and crafts for hundreds of years from as early as the 17th century. A third contributing factor is that art has historically been an obsorbing occupation for the Inuit when the weather has been too cold to leave the shelter.

46. Because of the large demand for refers to scapstone carvings in the 1970's.

√A, a lot of poor quality art was for sale

- B. people were more enthusiastic
- C. the markets were empty
- D. artists worked indoors

V. Đọc đoạn văn wa và chọn câu trả lời phù hợp cho các câu hỏi :  What exactly is a tornado? The general picture is familiar enough.	The
phenomenon usually occurs on a hot, sticky day with south wind and an omi	
sky. From the base of a thunderhead, a funnel-shaped cloud extends a viole	
twisting spout toward the Earth. As it sucks in matter in its path, the twister	_
turn black, brown or even white. The moving cloud shows an almost contin	_
display of sheet lightning. It lurches along in a meandering path, usually north	
ward, at 25 to 40 miles per hour. Sometimes it picks up its finger from the eart	
a short distance and then plants it down again. The funnel is very slender; its v	wake
of violence averages about 400 yards wide. As the tornado approaches, it is here	dded
by ■ roar as a hundreds of jet planes or thousands of railroad cars. Its path is ■	path
of total destruction. Buildings explode as they are sucked in by the tornado's	
pressure vortex (where the pressure drop'is as much as 10 percent) and by	4 4 40
powerful whirling winds (estimated at up to 500 miles per hour). The torns	ado's
powerful whirling winds (estimated at up to 500 miles per hour). The torne lifetime is as brief it is violent. Within a few tens of miles (average about	ado's
powerful whirling winds (estimated at up to 500 miles per hour). The torns	ado's

#### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi :

What kind of human being will the future spaceman be? Will he need bones of steel and powerful muscles to resist reciket thrust, the lungs of a glass blower, a mighty heart, the aplomb of an acrobat, uncronscious death urges, or a schizophrenic drive toward isolation? Popular ideas of a spaceman tend to the weird composites of comic-book fiction and fac: A more realistic portrait emerges from the young science of bio-astronautics, the newest and strangest of medical disciplines. The astronaut may be described as a youngish man of high intelligence who is normal to an abnormal degree. On earth, he may well have been a skin diver, high diver, tumbler, pole vaulter or acrobat. He must be highly motivated, carefully trained, and he must want to come back. His heart and lungs must be healthy but need not be exceptionally developed, for his cabin will be pressurized. Huge muscles may actually be a handicap, for he will have almost no way to get exercise, and he will find that the strength of a year-old child is adequate in the weightlessness of space. A compact body and a short, sturdy neck will help him to withstand the tremendous forces encountered at take-off. Most important physically, his digestive system must be one that will not be upset by weightlessness; he must not be subject to motion sickness.

B. ambulance

The pleasures which a movie film offers to our eyes have been paid for with the loss of sight of a man whose name is hardly known outside the annals of science – Joseph Plateau, a Belgian professor, born in Brussels in 1801.

C. taxi

D. fire engine

He studied the mechanism of sight, beginning a series of most dangerous experiments at the age of 28 by staring into the sun for 25 seconds to see what the effect on his eyes would be. He was blind for nearly a month. But he went on experimenting, increasing the length of time during which he looked into the sun, knowing that in the end, this would cost him his sight. At the age of 42, he was completely and incurably blind; the sun had destroyed the retina of his eyes. But he continued to work as well as he could until he died at the age of 82. Science profited enormously from his research. He studied the so-called inertia of the eye, which makes a picture remain on the retina for about one-sixth of a second after it has disappeared from our vision. This means that, if we see a succession of individual pictures each of which appears only for a fraction of a second, they "overlap" one another in our brain; and if they show consecutive phases of movement, that movement will appear to us continuous.

### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi:

In 1958, the Navy's nuclear-powered submarine Nautilus surfaced in the Greenland Sea after a 1830 mile journey, under the popular ice pack, from the Pacific to the Atlantic Ocean. A number of surface ships had sailed between those oceans, either via the Northwest Passage, close to the islands of the Canadian Arctic, or via the Northeast Passage, along the Northern coast of Europe and Asia; the Nautilus, however, was the first ship to go from ocean to ocean via the North Pole. The Nautilus, in 96 hours, sailed an almost direct course under the ice, travelling a greater part of the way at a depth of 400 feet and a speed of 20 knots. The submarine was well below the ice, which in general is only from 7 to 14 feet thick, though stalactites sometimes reach depths of 125 feet. This voyage effectively brought to the World's attention the potential role of nuclear-powdered submarines, capable of prowling beneath the polar pack and launching missiles from any of the countless lagoons and channels of open water that divide it. The submarine also seems to have been designed to offset the effect of the Soviet sputniks on world opinion. Although the Nautilus did not come back empty-handed from the scientific point of view, the voyage was as much a demonstration of potential as it was a scientific expedition. Undoubtedly, much more was learned about the polar pack by those aboard the two American and two Soviet ice-borne, scientific stations then adrift in the Arctic Ocean than by the group that manned by Nautilus.

41. The Nautilus was the first ship of any kind to sail between the Pacific Ocean and Atlantic Ocean along a northern route. B. False C. Implied D. Impossible to determine A. True 42. The unusual feature of the inter-ocean voyage was that the Nautilus \_ A. sailed to the Greenland Sea B. journeyed under the ice pack C. travelled thousands of miles D. travelled from the Pacific to the Atlantic Ocean 43. The length of time of the Nautilus's journey was \_ B. 169 hours C. 96 hours D. 183 hours A. 69 hours 44. The Nautilus A. steered a direct course via the North Pole B. travelled at a depth of 400 feet C. averaged 40 knots D. Both A and B 45. The polar ice pack generally measures. C. 14 feet thick A. 7 feet thick

D. 125 feet thick

B. 7 to 14 feet thick

46.	The journey of the Nautilus
	A. had no military significance
	B. proved to the world the capability of nuclear-powered submerines to navigate in polar waters
	C. proved that atomic-powered submarines cannot be used to launch missiles  D. was little noted by the rest of the world
47.	
	A. is solid ice from one end to the other
	B. from a military standpoint is useless
	C. contains lagoons and channels of open water
	D. Both A and
48.	
101	A. to prove the feasibility of launching moon satellite from the Greenland
Sea	, and the property of the state

V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi :

At the bottom of the world lies a mighty continent still wrapped in the Ice Age and, until recent times, unknown to man, it is a great land mass crisscrossed by mountain ranges whose extent and elevation are uncertain. Much of the continent is a complete blank on our maps. A 1,000-mile stretch of the coastline has never been reached by any ship. Man has explored on foot, less than one per cent of its area. Antarctica differs fundamentally from the arctic regions. The Arctic is an ocean, covered with drifting packed ice and hemmed in by the land masses of Europe, Asia, and North America. The Antarctic is a continent almost as large Europe and Australia combined, centered roughly on the South Pole and surrounded by the most unobstructed water areas of the world - the Atlantic, Pacific and Indian Oceans. The continental ice sheet is more than two miles high in its center; thus, the air over the Antarctic is far more refrigerated than it is over the Arctic regions. This cold air cascades off the land with such force that it makes the nearby seas the stormiest in the world and renders unliveable those regions whose counterparts at the opposite end of the globe are inhabited. Thus, more than a million persons live within 2,000 miles of the North Pole in an area that includes most of Alaska, Siberia and Scandinavia - region rich in forest and mining industries. Apart from a handful of weather stations within the same distance of the South Pole, there is not we single tree, industry or settlement.

	- *								
41.	Antarctica is								
	A, at the top of the world	C. fully explored

### V. Đọc đoạn văn wa và chọn câu trả lời phù hợp cho các câu hỏi :

a. The invention of the electric telegraph gave birth to the communications industry Although Samuel Morse succeeded in making the invention useful in 1837, it was not until 1843 that the first telegraph line of consequence was constructed. By 1860, more than 50,000 miles of lines connected people east of the Rockies. The following year, San Francisco was added to the network. The national telegraph network fortified the ties between East and West and contributed to the rapid expansion of the railroads by providing an efficient means to monitor schedules and routes. Furthermore, the extension of the telegraph, combined with the invention of the steam-driven rotary printing press by Richard Hoe in 1846, revolutionized the world of journalism. Where the business of news gathering had been dependent upon the mail and on hand—operated presses, the telegraph expanded the amount of information a newspaper could supply and allowed for more timely recording. The establishment of the

. 119

Associated Press as a central wire service in 1846 marked the advent of a new era in journalism.

- 41. The main topic of the passage is
  - A. The history of journalism
    - B. The origin of the national telegraph
    - C. How the telegraph network contributed to the expansion of railroads
    - D. The contributions and development of the telegraph network
- 42. The word "gathering" underlined refers to
  - A. people
- B. information C. objects
- D. substances
- 43. The author's main purpose in this passage is to\_\_\_\_
  - A. compare the invention of the telegraph with the invention of the steamdriven rotary press.
  - B. propose new ways to develop the communications industry.
  - C. show how the electric telegraph affected the communications industry.
  - D. criticize Samuel Morse
- 44. This passage would likely be found in a \_\_\_\_\_.
  - A. U.S history book

C. book on trains

B. science textbook

- D. computer magazine
- 45. It can be inferred from the passage that
  - A. Samuel Morse did not make a significant contribution to the communcations industry
  - B. Morse's invention did not immediately achieve its full potential
  - C. the extension of the telegraph was more important than its invention
  - D. journalists have the Associated Press to thank for the birth of the communications industry
- b. Ever since human have inhabited the Earth, they have made use of the various forms of communication. Generally, this expression of thoughts and feelings has been in the form of oral speech. When there is a language barrier, communication is accomplished through sign language in which motions stand for letters, words and ideas, tourists, the deaf and the mute have had to resort this form of expression. Many of these symbols of whole words are very picturesque and exact and can be used internationally, spelling, however, cannot. Body language transmits ideas or thoughts by certain actions, either intentionally or unintentionally. A wink can be a way of flirting or indicating that the party is only joking. A nod signifies approval while shaking the head indicates a negative reaction. Other form of non-linguistic can be found in Braille, signal flags, Morse code and smoke signal. Road maps and picture signs also guide, warn and instruct people. While verbalization is the most common form of language, other system and techniques also express human thoughts and feelings.
- 46. Which of the following best summary of the passage?
  - A. When language is a barrier, people will find other forms of communication.
  - B. Everyone uses only one form of communication.
  - C. Non-linguistic language is invaluable to foreigners
  - D. Although other forms of communication exist, verbalization is the fastest

47. All of the following statements are true EXCEPT A. There are many forms of communication which is existent today B. Verbalization is the most common form of communication C. The deaf and mute use oral form of communication D. The ideas and thoughts can be transmitted by body language 48. Which form other than oral speech would be commonly used among blind people? A. Picture signs B. Braille C. Body language D. Signal flags 49. People need to communicate in order to A. create language barrier C. be picturesque and exact B. keep from reading with finger tips D. express thoughts and feelings 50. Which is the best title for the passage? A. The Importance of Sign Language. B. Many forms of communication. C. Ways of Expressing Feelings. D. Picturesque Symbols of Communication. ### V. Dọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi:

a. The population of the World has increased more in modern times than in all other ages of history combined. World population totalled about 500 million in 1650. It doubled the period from 1650-1850. Today the population is more than five billion. Estimates based on research by the United Nations indicate that it will more than

double in the twenty-five years between 1975 and the year 2000, reaching seven billion by the turn of the century. No one knows the limits of population that the Earth can support. Thomas Malthus, an English economist, developed a theory that became widely accepted in the 19<sup>th</sup> century. He suggested that because world population tented to increase more rapidly than the food supply, continual strain was exerted upon available resource. Malthus cited wars, famines, epidemics and other disasters as the usual limitations of population growth. With recent advances in science and technology, including improved agricultural methods and great strides in medicine, some of the limiting factors in population growth have been lessened, with obvious results. International organizations have recommended programs to encourage general economic development in target areas along with decrease in birth rates to effect a lasting solution.

- 41. The title below that best expresses the ideas in the passage is:
  - A. Thomas Malthus Theory
  - B. The United Nations Estimate
  - C. Limiting Factors in Population Growth
  - D. A Brief History of Population and Overpopulation
- 42. According to this passage, by the year 2000, the Earth's population should exceed the present figure by how much?

A. 500 million B. 5 billion
43. Who was Thomas Malthus?

A. A scientist C. An economist

B. A doctor of medicine D. A United Nations representative

C. 2 billion

D. 7 billion

44. According to the passage, why has overpopulation been caused?

A. Improved technology B. Disasters C. Scarcity D. Precaution

- 45. What do most experts recommend to solve problems of overpopulation?
  - A. Famine and epidemic.
  - B. Medical advance and improved agricultural methods.
  - C. Economic development and a decline in the birth rate.
  - D. Conversation of available resources.
- b. According to census of 1800, the United States of America contained 5,308,483 people. In the same year, the British Islands contained upwards of fifteen million, the French Republic more than 27 million. Nearly one-fifth of American people were black slaves; the true political population consisted of four and a half million free whites, or less than one million able-bodied males, on whose shoulders fell the burden of m continent. Even after two centuries of struggle, the land was still untamed; forest covered every portion, except here and there a strip of cultivated soil; the minerals lay undisturbed in their rocky beds, and more than two-thirds of the people clung to the seaboard within fifty miles of tidewater, where alone the wants of civilized life could be supplied.
- 46. In the United States of America in 1800,\_\_\_\_\_.
  - A. one out of every 25 Americans was a black slave
  - B. one out of every 4 Americans was a black slave
  - C. two out of every 3 Americans were black slaves
  - D. one out of every 5 Americans was a black slave

### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi :

- a. Hundreds of species of marine life manage to survive even in the darkest depths of the ocean. These tenants of the depth have evolved some extremely ingenious devices for locating their food and enemies. Where the light is very dim, some of these deepwater species have developed enormous eyes with telescopic lenses very much like those of owls. Others especially the fish that survive where there is no light at all are quite blind but have developed long feelers that enable them to identify and collect stray bits of food that come within a considerable radius. Some habitants of the depth supply their own light. They have built-in torches that they can switch on and off depending on whether they are pursuing or being pursued. Some have regular lamps, spots of steady light, which spread a faint glow through water around them. One deepwater squid can squirt a luminous that cousins nearer the surface to becloud and darken the water. It's supposed that about half of the varieties of fish living in the dark depths of the ocean have some power of illumination.
- 41. In order to survive, all species of the depth must be able to\_\_\_\_\_.
  - A. supply their own light
- C. locate food and enemies
- B. compensate for the lack of light
- D. Both B and C
- 42. Most of the marine species living in the darkest depths have \_\_\_\_\_\_
  - A. learned to live without light
  - B. evolved ingenious devices to help them
  - C. found ways to supply their own light
  - D. developed sensitive eyes
- 43. According to the selection, some species that live where there is no light have
  - A. long, sensitive feelers

C. enormous owl-life eyes

B. luminous fins

D. no actual eyes

- 44. It is supposed that about half of the varieties of fish living in the dark depths have \_\_\_\_\_.
  - A. evolved more than one means of creating light
  - B. some power of illumination
  - C. developed sensitive feelers
  - D. almost telescopic eyes
- 45. Implied but not stated
  - A. Where there is no light, the power of illumination is necessary for survival.
    - B. Food getting is a difficult problem in the ocean depths.
    - C. When a fish is being pursued, it often turns off its light.
    - D. All fish in the darkest depths of the ocean have some device to compensate for lack of light.
- **b.** Over the past 600 years, English has grown from a language of few speakers to become the dominant language of international communication. English as we know it today emerged around 1350, after having incorporated many elements of French that were introduced following the Norman invasion of

to 66. Until the 1600's, English was, for the most part, spoken only in England and had not extended even as far as Wales, Scotland or Ireland. However, during the course of the next two centuries, English began to spread around the globe as a result of exploration, trade, colonization and missionary work. Thus, small enclaves of English speakers became established and grew in various parts of the World. As these communities proliferated, English gradually became the primary language of international business, banking and diplomacy. Currently, about 80 percent of the information stored on computer systems worldwide is English. Two - thirds of the World's science writing is in English, and English is the main language of technology, advertising, media, international airports and air traffic controllers. Today there are more than 700 million English users in the world and over half of these are non-native speakers constituting the largest number of non-native users than any other language in the world.

- 46. What is the main topic of this passage?
  - A. The number of non-native users of English.
  - B. The French influence on the English language.
  - C. The expansion of English as an international language.
  - D. The use of English for science and technology.
- 47. Approximately when did English begin to be used beyond England\_\_\_\_\_.

  A. in 1066 B. around 1350 C. before 1600 D. after 1600
- 48. According to the passage, all of the following contributed to the spread of English around the world EXCEPT\_\_\_\_\_\_.
  - A. the slave trade

C. missionaries

- B. the Norman invasion
- D. colonization
- 49. The word "enclaves" underlined could be best replaced by \_\_\_\_\_.
  - A. communities B. organizations C. regions

D. countries

- The word "proliferated" is closest in meaning to\_\_\_\_
  - A. prospered
- B. organized
- C. disbanded
- D. expanded

#### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi :

a. A Japanese construction company plans to create a large independent city state, akin to the legendary Atlantis, in the middle of the Pacific Ocean. The city, dubbed "Marinnation" would have about one million inhabitants, two airports and possibly a space port Marinnation, if built, would be a separate country but could serve as a home for international organizations such as the United Nations and World Bank, Aside from the many political social problems that would have to be solved, the engineering task envisaged is monumental. The initial stage requires the building of a circular dam 18 miles in diameter attached to the bed in relatively shallow place in international waters. Then, several hundred powerful pumps, operating for more than vear, would suck out the sea water, from within the dam. When empty and dry, the area would have a city constructed on it. The actual land would be about 300 feet below sea level. According to designers, the hardest task from engineering point of view would be to ensure that the dam is leak proof and earthquake proof. If all goes well, it is hoped that Marinnation could be ready for habitation at the end of the second decade of the 21" century. Whether any one would want to live in such an isolated and artificial community, however, it will remain an open question until that time.

41.	To what does "The city" underlined re	efer?	
	A. Japanese constructions company	C. The United Na	ations
	B. Atlantis	D. A future city	
<b>12</b> .	What kind of city will Marinnation b	e?	
	A. Underground B. Underwater	C. Marine	D. Legendary
43.	The tone of this passage is		
	A. sarcastic B. humorous	C. judgmental	D. informative
44.	The problem of Marinnation focused	on here are mainly	100 parameter 40 de sus - 40 festas II
	A. human B. engineering	C. political	D. social
45.	By referring to Atlantis in the passag	ge, the author is say	ying that
	A. Marinnation will never be built	B. Marinnation is	s a city in the ocean
	C. even if built, Marinnation will fail	D. Marinnation i	s only a dream

b. Let children learn to judge their own work. A child learning to talk does not learn by being corrected all the time: if corrected too much, he will stop talking. He notices much thousand times a day the difference between the language he

the language those around him use. Bit by bit, he makes the necessary changes to make his language like other people's. In the same way, children learning to do all the other things they learn to do without being taught to walk, run, climb, whistle, ride a bicycle, compare their own performances with those of more skilled people, and slowly make the needed changes. But in school, we never give a child - chance to find out his mistakes for himself, let alone correct them. We do it all for him. We act as if we thought that he would never notice a mistake unless it was pointed out to him, or correct it unless he was made to. Soon he becomes dependent on the teacher. Let him do it himself. Let him work out with the help of other children if he wants it, what this word says, what the answer is to that problem, whether this is a good way of saying or doing this or not. If it is a matter of right answers, as it may be in mathematics or science, give him the answer book. Let him correct his own papers. Why should we, teachers, waste time on such routine work? Our job should be to help the child when he tells us that he can't find the way to get the right answer. Let's end all this nonsense of grades, exams, marks. Let us throw them all out, and let the children learn what all educated persons must learn some day, how to measure their own understanding, how to know what they know or do not know. Let them get on with this job. In the way that seems most sensible to them, with our help as school teachers if they ask for it. The idea that there is a body of knowledge to be learned at school and used for the rest of one's life is nonsense. In a world as complicated and rapidly changing as ours - Anxious parents and teacher say, "But suppose they fail to learn something essential, something they will need to get on in the world?" Don't worry! If it is essential, they will go out into the world and learn it.

- 46. What does the author think is the best way for children to learn things?
  - A. By copying what other people do.
  - B. By making mistakes and having them corrected.
  - C. By listening to explanations from killed people.
  - D. By asking many questions.
- 47. What does the author think teachers do which they should not do?
  - A. They give children correct answers.
  - B. They point out children's mistakes to them.
  - C. They allow children to mark their own work.
  - D. They encourage children to copy from one another.
- 48. The passage suggests that learning to speak and learning to ride a bicycle are:
  - A. Not really important skills.
  - B. More important than other skills.
  - C. Basically different from learning adult skills.
  - D. Basically the same as learning other skills.
- 49. Exams, grades and marks should be abolished because children's progress should only be estimated by\_\_\_\_\_\_.
  - A. educated people B. children themselves C. teachers D. parents
- 50. The author fears that children will grow up into adults who are\_\_\_\_
  - A. too independent of others
- C. unable to think for themselves
- B. too critical of themselves
- D. unable to use basic skills

### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi:

a. Computer programmer David Jones earns 35,000 pounds a year designing new computer games, yet he cannot find a bank prepared to let him have a cheque card. Instead he has been told to wait another two years until he is 18. The 16-year-old works for a small firm in Liverpool, where the problem of most young people of his age, is finding a job. David's firm releases two new games for the expanding home computer market each month. But David's biggest headache is what to do with his money. Despite his salary, earned by inventing new programs within tight schedules with bonus payment and profit sharing, he cannot drive a car, take out a mortgage or obtain credit cards. He lives with his parents in their council house in Liverpool where his father is a bus driver. His company has to pay 150 pounds a month in taxi fares to get him the five miles to work and back every day because

David cannot drive. Davit got his job with the Liverpool-based company four months ago, a year after leaving school with six O-levels and working for a time in a computer shop. He spends some of his money on records and clothes, and he gives his mother 20 pounds a week. But most of his spare time is spent on working. David said he would like to ear a million and he supposed early retirement is a possibility.

- 41. What is David different from other young people of his age?
  - A. He earns an extremely high salary B. He is not unemployed
  - C. He does not go out much D. He lives at home with his parents
- 42. David's greatest problem is \_\_\_\_\_
  - A. making the banks treat him as an adult
  - C. spending his salary

- B. inventing computer games
- D. learning to drive
- 43. He was employed by the company because
  - A. he had worked in a computer shop
  - B. he had written some compute programs
  - C. he works very hard
  - D. he had learned to use computers at school
- 44. He left school after taking O-levels because
  - A. he did not enjoy school
  - B. he wanted to work with computers and staying at school
  - C. he was afraid of getting too old to start computing
  - D. he wanted to earn much money
- 45. Why does David think he might retire early?
  - A. You have to be young to write computer programs
  - B. He wants to stop working when being a millionaire
  - C. He thinks computer games might not sell well
  - D. He thinks his firm might go bankrupt
- b. For centuries, sky watchers have reported seeing mysterious flashes of light on the surface of the Moon. Modern astronomers have observed the same phenomenon, but no one has been able to satisfactorily explain how or why the Moon sporadically sparks. However, researchers now believe they have found the cause. Researchers have examined the chemical content of Moon rocks retrieved by astronauts during the Apollo missions and have found that they contain volatile gases such as helium, hydrogen and argon. The researchers suggest that stray electrons, freed when the rock cracks, may ignite these gases. Indeed, lunar rock samples, when fractured in the lab, throw off sparks. What causes these rocks to crack to the lunar surface? The flashes are often seen at the borders between sunlight and on the Moon, where the surface is being either intensely heated or cooled. A sudden change in temperature may cause thermal cracking. Another possibility is that meteors may strike the rocks and cause them to crack. Finally, lunar rocks may be fractured by seismic events in other words, by tiny moonquakes.
- 46. Which of the following statements describes the organization of the passage?
  - A. A popular notion is refuted.
  - B. A generalization is made and its examples are given.
  - C. The significance of an experiment is explained.
  - D. A phenomenon is described and a possible explanation is proposed.

### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi :

a. Reading to oneself is a modern activity which was almost unknown to the scholar of the classical and medieval worlds while during the 15th century, the term "reading' undoubtedly meant reading aloud. Only during the 19th century did silent reading become commonplace. One should be wary, however of assuming that silent reading came about simply because reading aloud is a distraction to others. Examinations of factors related to the historical development of silent reading reveals that it became the usual mode of reading for most adult reading tasks mainly because the tasks themselves changed in character. The last century saw a steady gradual increase in literacy, and thus in the number of readers increased, so the number of potential listeners declined, and thus there was some reduction in the need to read aloud. As reading for the benefit of

listeners grew less common, so came the flourishing of reading as a private activity in such public places as libraries, railway carriages and offices where reading aloud would cause distraction to other readers. Towards the end of the century, there was still considerable argument over whether books should be used for information or treated respectfully, and over whether the reading of material such as newspapers was in some way mentally weakening. Indeed, this argument remains with us in education. However, whatever its virtue, the old shared literacy culture had gone and was replaced by the printed mass media on the one hand and by books and periodicals for m specialized readership on the other. By the end of the century, students were being recommended to adopt attitudes to books and to use skills in reading them which were inappropriate, if not impossible, for the oral reader. The social, cultural and technological changes in the century had altered what the term "reading" implied.

- 41. Why was reading aloud common a clore the 19th century?
  - A. Silent reading had not been discovered.
  - B. There were few places available for private reading.
  - C. Few people could read for themselves.
  - D. people relied on reading for entertainment.
- 42. The development of silent reading during the 19th century indicated\_\_\_\_\_
  - A. a change in the status of literate people.
  - B. a change in the nature of reading.
  - C. an increase in the number of books.
  - D. an increase in the average age of readers.
- 43. Educationalists are still arguing about\_\_\_
  - A. the importance of silent reading
  - B. the amount of information yielded by books and newspapers
  - C. the effects of reading on health
  - D. the value of different types of reading
- 44. The emergence of the mass media and of specialised periodicals showed that
  - A. standards of literacy had declined
  - B. readers' interests had diversified
  - C. printing techniques had improved
  - D. educationalist's attitudes had changed
- 45. What is the writer of this passage attempting to do?
  - A. Explain how present day reading habits developed.
  - B. Change people's attitudes to reading.
  - C. Show how reading methods have improved.
  - D. Encourage the growth of reading.
- b. I have examined man's wonderful inventions. And I tell you that in the art of life, man invents nothing, but in the art of death, he outdoes nature herself and produces by chemistry and machinery all the slaughter of plague, pestilence and famine. The peasant today eats and drinks what was eaten and drunk by the peasants of ten thousand years ago, and the house he lives in has not altered as

much in a thousand centuries as the fashion of a lady's bonnet in a score of weeks. But when he goes out to kill, he carries a marvel of mechanism, that lets loose at a touch of finger all hidden molecular energies, and leaves the javelin, the arrow, the blowpipe of his fathers far behind.

	the state of the s											
46.	The author's attitude towards science is											
	A. optimistic B. indifferent D. pessi	mistic	D. neutral									
47.	In the writer's opinion,											
	A. man does not invent anything											
	B. man's inventions cannot destroy anything											
	C. man's inventions do not improve our ways of	living										
	D. nature is better that man in causing death											

- 48. The most dreadful killing forces mentioned in the text are\_\_\_\_\_
  - A, pestilence and famine

C. natural forces

B. machines

- D. molecular energies
- 49. The best title for the passage is:
  - A. Chemistry and machinery
  - C. Our father's weapons
  - B. Man's latest invention
  - D. The killing power of scientific inventions
- 50. Which of the following statements is NOT TRUE?
  - A. Fashions of women's clothes change more quickly than the house style
  - B. Our fathers spent more physical strength in handling their weapons than we do now
  - C. We cannot handle the javelin by using a finger
  - D. Our food and drink are quite different from our ancestors

- b. The search for alternative sources of energy has led in various directions. Many communities are burning garbage and other biological waste products to produce electricity. Converting waste products to gases or oil is also an efficient way to dispose of waste. Experimental work is being done to derive synthetic fuels from coal, oil shale and coal tars. But to date, that process has proved expensive. Other experiments are underway to harness power with giant windmills. Geothermal power, heat from the earth, is also being tested. Some experts expect utility companies to revive hydroelectric power derived from streams and rivers. Fifty years ago, hydroelectric power provided one third of the electricity used in the United States, but today it supplies only 4 percent. The oceans are another potential source of energy. Scientists are studying ways to convert the energy of ocean currents, tides and waves to electricity. Experiments are also underway to make use of temperature differences in ocean water to produce energy.
- 46. Which is the best title for the passage?
  - A. The Use of Water Products for Energy.
  - B. The Search for Alternative Sources of Energy.
  - C. Efficient Ways of Disposing if Waste.
  - D. New Discoveries in Geothermal Power.
- 47. Fifty years ago, one third of the electricity in the United States was provided by\_\_\_\_\_.
  - A. wind B. waste products C. water D. oil
- 48. The word "synthetic fuels" underlined could best be replaced by \_\_\_\_\_\_

  A. Biological fuels C. Fast burning fuels
  - C. Low burning fuels

    D. Artificially made fuels
- 49. According to the passage, the impracticability of using coal, oil shale, and coal tars as sources of energy is due to\_\_\_\_\_.
  - A. their being time consuming C. the scarcity of sources
  - B. their being money consuming D. the lack of technology
- 50. What can be inferred from "Some experts . . . energy."?
  - A. All alternative production of energy will be derived from water.
  - B. Hydroelectric power will be the main source of energy.
  - C. Synthetic fuels will be the principal source of alternative energy.
  - D. Alternative energy will come from a variety of sources.

#### V. Đọc đoạn văn sau và chọn câu tra lời phu hợp cho các câu hỏi :

- a. The planet Earth is 4.600 million years old it is difficult for us to think about such an enormous length of time because it has little meaning for us. We can, however, simplify the idea to make it more understandable. We can compare the planet Earth to a person of forty six years old. Nothing is known about the first seven years of this person's life. Very little information exists about the middle period either. It was only at the age of 42 that the Earth began to flower. Dinosaurs and great reptiles did not appear until one year ago when the planet was 45. Mammals only arrived 8 months ago. In the middle of last week, man like ages became age - like men and began to communicate with each other. Last weekend, the Ice Age covered the Earth. Modern man has only been around for 4 hours. During the last hour, man discovered agriculture. The Industrial Revolution and the rise of large cities began just 60 seconds ago. During that short time, modern man has made a rubbish tip of the Earth, In one minute, he has increased his numbers to terrible proportions, and has caused the death of hundreds of species of animals. He has robbed and destroyed the planet in his search for fuels, now he stands like violent, spoilt child, delighted at the speed of his rise to power on the edge of the final mass destruction and of killing all the life which exits in the solar system.
- 41. The passage tells us that \_\_\_\_\_.
  - A. a great deal is known about how the Earth was created
  - B. life on Earth began relatively recently
  - C. more is known about the first part of the Earth's life than the middle part
  - D. scientists are well informed about the middle part of the Earth's life
- 42. We are informed by the author that \_\_\_\_\_.
  - A. the dinosaurs appeared during the middle period
  - B, mammals and great reptiles both appeared at the same time
  - C, there were more than 45 kinds of great reptiles
  - D. ape-like men appeared before the last Ice Age
- 43. The author is mainly interested in \_\_\_\_\_.
  - A. the time when man first evolved from apes
  - B. what has happened since the Industrial Revolution
- C. the effects of farming

  D. the period before the last Ice Age

  44. It would appear that the main danger ahead is that

  ...
  - A, man will destroy everything on Earth
    - B. man will use up all the fuels
    - C. there will be population explosion
    - D. more species of animal may die out
- 45. The author's general view of man seems to be that\_\_\_\_\_.
  - A. he has no right to be so destructive
  - B. he has been the most successful animal
    - C. he will be able to control the environment
    - D. he's learnt a lot from past mistakes
- b. As computers have become powerful tools for the rapid and economic production of pictures, computer graphics has emerged as one of the most rapidly growing fields in computer science. It is used routinely in such diverse areas as business, industry, art, government, education, research, training and medicine. One

of the initial uses of computer graphics, and ultimately its greatest use, has been as aid to design, generally referred to as computer - aided design (CAD). One of its greatest advantages is that designers can see how an object will look after construction and make changes freely and much more quickly than with hand drafting. For three-dimensional rendering of machine parts, engineers now rely on CAD. Automobile, spacecraft, aerospace, and ship designers use CAD techniques to design vehicles and test their performance. Building designs are created with computer graphics systems. Architect can design a building layout create threedimensional model, and even go for a simulated "walk" through the rooms or around the outside of the building. Business graphics is another rapidly growing area of computer graphics, where it is used to create graphs, charts and cost models to summarize financial, statistical, mathematical, scientific and economic data. As an educational aid, computer graphics can be used to create weather maps and cartographic materials. Computer art has creative and commercial art applications where it is used in advertising, publishing and film productions, particularly for computer animation, which is achieved by a sequential process.

46. What does the passage mainly discuss?

A	Routine		05		nut ana
a.	Monthia	uses	OL	COTH	puters

- B. Computers graphics applications.
- C. The rapidly growing field of computer science.
- D. Computer as the future architects.

47.	The	word	"It"	underlined	refers	to	
					_		

A, computer graphics B. computer science C. fields D. computers

48. The "One of building" designs would most likely be about\_\_\_\_

A. computer animation

C. cost models

B. flight training

D. applications of CAD

According to the passage, architects use CAD to\_\_\_\_\_\_.

A. inspect buildings

C. make cartographic materials

B, create graphs

D. create three-dimensional models

According to the passage, engineers use CAD for\_\_\_

A. a simulated "walk" through model rooms B. rendering machine parts

C. making cost models

D. advertising

#### V. Đọc đoạn văn sau và chọn câu trả lời phù hợp cho các câu hỏi:

a. Every word on a label describing a food, a drug, a cosmetic or a medical device is important in protecting you and your family from buying an inferior product, from misusing a good one, from being tricked by dangerous quackery, or from unknowing possessing an item harmful to health. First of all, the label on a can or package of food must be completely truthful. If a loaf of bread is made with soy flour, the loaf can't be labeled as white bread. A label must not be misleading. This restriction is somewhat vague and therefore can't prevent all violations. Although the government tries to eliminate all misleading labels, the consumer must be always on guard. Just because a can of sardines has a fancy sounding foreign name, don't take for granted that the fish were imported. It is the law, too, that the manufacturers must list their names and places of business on their labels. Manufactures must use common names in identifying their products so that anyone can readily understand what he is buying, Synthetic foods must be prominently labeled as artificial. Foods composed of two or more ingredients must bear labels listing ingredients in the order of predominance.

41.	According to the article, the main purpose of a label is to									
	A. attract the consumer	C. list the ingredients								
	B. protect the consumer	D. protect the manufacturer								
42.	Careful reading of the label will prevent									
	A. misuse of a product	C. buying a harmful substance								
	B. buying an inferior product	D. Both A, B and C								
43.	The author suggests that									
	A. some labels are misleading in spite of government inspection									
	B. all labels are misleading									
	C. most labels are vague									
	D. the government does nothing about misleading labels									
44.	A foreign name on a label									
	A. is never misleading									
	B. always indicates that the product is imported									
	C. may lead one to believe that the product is imported									
	D. is never completely truthful									
45.	The most important ingredient in a product must be listed									
1	A. first B. last	C. in the middle D. as artificial								

b. A recent investigation by scientists at the U.S Geological survey shows that strange animal behaviour might help predict future earthquakes. Investigators found such occur in a ten-kilometre radius of the epicenter of a fairly recent quake. Some birds screeched and flew about wildly; dogs yelped and rant around uncontrollably. Scientists believe that animals can perceive these environmental changes as early as several days before the mishap. In 1976, after

observing animal behaviour, the Chinese were able to predict a devasting quake. Although hundreds of thousands of people were killed, the government was able to evacuate millions of other people and thus keep the death toll at n lower level.

- 46. What prediction may be made by observing animal behaviour?
  - A. An impending earthquake.
  - B. The number of people who will die.
  - C. The ten-kilometer radius of the epicenter.
  - D. Environmental changes.
- 47. Why can animals perceive these changes when humans cannot?
  - A. Animals are smarter than humans.
  - B. Animals have certain instinct that humans don't possess.
  - C. By running around the house, they can feel the vibrations.
  - D. Humans don't know where to look.
- 48. Which of the following is not true?
  - A. Some animals may be able to sense an approaching earthquake.
  - B. By observing animal behaviour, scientists can predict earthquakes.
  - C. The Chinese have successfully predicted an earthquake and saved many lives.
  - D. All birds and dogs in a ten-kilometer radius of the epicenter went wild before the earthquake.
- 49. In this passage, the word "evacuate" underlined mostly means

  A. remove
  B. exile
  C. destroy
  D. emaciate

  50. If scientists can accurately predict earthquake, there will be
  A. fewer animals going crazy
  B. a lower death rate
  C. fewer people evacuated
  D. fewer environmental changes
